

# Global to Local

working with you for  
a sustainable future

## **Our mission**

*We assist public and private sector organisations to improve their environmental performance and mainstream sustainability*

## **Services we provide**

*and how they can help you implement the efficiency and business transformation agenda*

### **Climate Change**

A systematic organisational response to the climate change challenge both in terms of mitigation and adaptation – *more effective and systematic management will help you save resources and costs and help reduce carbon footprints*

### **Environmental Management Systems**

Systems to continuously improve environmental and sustainability performance and climate change response – *identifying areas where you can make significant gains*

### **Sustainable Procurement**

Shifting the focus of procurement to more sustainable products and services – *better, more imaginative procurement to help develop markets, bring down product costs, make your services more sustainable*

### **Corporate Social Responsibility**

Helping identify and improve the key social, environmental and economic impacts of an organisation – *developing integrated management and reporting approaches*

### **Sustainability Assessments**

Ensuring projects optimise sustainability considerations – *helping you implement your policies*

### **Project design**

Developing leading edge projects for EU and other funding applications – *finding synergy between your objectives and those of major funding streams*

### **Project Management**

Managing all aspects of major projects – *helping you implement projects more efficiently and streamline systems*

### **Facilitation, Partnerships and Networking**

Working with you and your partners for better sustainability performance – *getting the best out of joint working*

### **Training**

Helping you and your staff to improve performance – *improving the efficiency of the organisation*

### **Fundraising**

Assisting you in raising funds for sustainability projects – *attracting funding for your mainstream innovative work, including Landfill Tax*

### **Best European Practice**

Sharing and exchanging leading edge knowledge on sustainability practice from across the EU – *free R&D from across Europe*

### **Research**

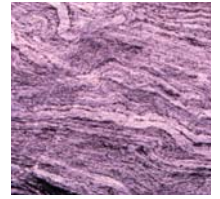

Developing understanding and knowledge of sustainability issues – *helping you to focus on innovation in a manageable way*

### **Education and schools events**

Assisting the roll out of sustainable issues to local schools – *preparing the ground for bigger involvement in the community*

### **Conferences and Events**

Helping you project yourself

## Why Global to Local?

**We know local government** – our consultants have extensive experience of working in public sector organisations, many in senior positions.

**We have a good understanding of the efficiency, Value for Money, reform and business transformation of services agenda** - our staff has supported a number of projects nationally and regionally that aim to spread more sustainable practice and behaviour (strategic and project support for the Regional Centres of Excellence, the Public Sector Food Procurement Initiative etc).

**We know how to improve environmental performance systematically** - and have demonstrated our ability to help cities and municipalities in many European Countries to achieve EMS verification.

We can work with local authorities and local communities to deliver pragmatic **output focused approaches** to climate change adaptation and mitigation and help to reduce **carbon footprints**.

**We have an excellent track record in attracting EU co-funding** - we design and manage a number of EU co-funded projects for our local authority clients.

**We are committed to helping organisations identify and address their corporate social responsibility** through establishing integrated management of the key social, economic and environmental impacts.

**We understand sustainable procurement** – and are able to focus on practical and manageable steps for implementation such as the 2007/08 National Sustainable Products Catalogue.

**We help facilitate and support partnerships and networking - to empower** you and your partner organisations to mainstream your sustainability efforts.

**We have an international perspective** – with offices in five European countries, working with partners across Europe we can bring in-depth knowledge of best European practice to the table

**We are a learning organisation**, seeking to evolve our added value, working with leading research institutions and organisations and specialists, where necessary, to provide the best possible advice to all clients.

**We are an organisation that walks the talk** – we are a virtual (ie home office) based organisation with a verified ISO14001 system in place to help reduce our own environmental impacts, and to help our clients reduce theirs.

[info@globaltolocal.com](mailto:info@globaltolocal.com)

Global to Local Ltd is a leading sustainable development consultancy founded in 1996. We work with central, regional and local government, the private sector and others, to create a sustainable future. Our aim is to challenge our clients to define and deliver locally appropriate policies and actions.

Global to Local has no central offices and is believed to be the only 'virtual' company with an ISO14001 certified EMS.
